AIRFORCE HOVER MOWER

AIR FORCE HOVER MOWERS

Air Force Hover Mowers are built with a simple principle in mind: Use the best materials, the most advanced engineering and manufacturing techniques, and the products will be the best on the market. Those reasons are why Air Force Hover Mowers are the best performing hover mowers in the industry. Over 25 years of experience went into the design and the choice of materials so that Air Force Hover Mowers would provide outstanding performance and durability every time they go out on the job.

MODEL AND SPECIFICATIONS:

F-19

Cutting Width: 19”

Cutting Height: ½” – 2 ½”

Dry Weight: 38 lbs.

Engine: Honda GCV-160 160cc

Deck: Injection Molded ABS

Impeller: Diameter = 14”
Height = 1 ½”

Handle: Length = 53”
Thickness = .0725”

Deck Underside

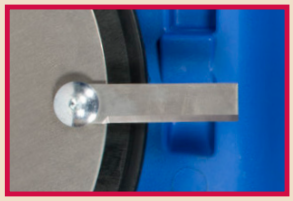
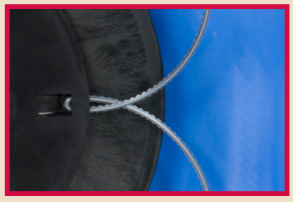
JOINING ADVANCED DESIGN WITH HIGH QUALITY MATERIALS TO ACHIEVE SUPERIOR PERFORMANCE.

BLADE OPTIONS:



SS BLADE SYSTEM
Hardened Stainless Steel - reversible and sharpenable

QC BLADE SYSTEM
Hardened steel insert surrounded by nylon casing



FLEXIBLADE CUTTING SYSTEM
Cutting line with solid core and serrated edges

HONDA POWER

All AIR FORCE Hover Mowers are powered by Honda 4-stroke engines. Honda engines provide stable high-torque power along with low noise and emission output. Uniblock engineering minimizes mechanical complexity and reduces vibration.

The GCV-160 engine is mounted in reverse (spark plug facing operator) to maximize lubrication on slopes. Primary lubrication is provided by Honda's Cup and Dipper Splashing System that showers the internal components with oil. In addition, a cogged belt helps take oil to the top of the engine added lubrication.

IT IS IMPORTANT TO NOTE THAT THE GCV ENGINES ARE LIMITED TO 45 DEGREE ANGLE OF USE OR RISK ENGINE DAMAGE.

Please contact Seago with any questions about engine performance, limitations and longevity.
